

Hafiz M. Hassan

~ Data Scientist

Contact:

Address: Lahore, Pakistan.

Portfolio: [Hassan Nawaz](#) | [CS Professional](#)

Phone: +923224191692

Email: hafizhassan142003@gmail.com

Education:

Matric – (2020-2022)

UGI, Lahore.

ICS – (2022-2024)

GCU, Lahore.

BS Data Sciences –

(2024-Till date)

FAST NUCES, Lahore.

Projects:

- Travel Buddy+
- CADS-Bridge
- CPU Storm
- Movie Recommendation-Web
- Sentiment Predictor AI Model
- Library Management System
- Ludo-Web
- GearPro-Web
- Solar Recommendation App
- Social Network App

Summary:

Driven Data Science student at FAST NUCES — Pakistan's most prestigious CS institution — operating at the intersection of AI, full-stack web engineering, and applied machine learning. Co-founded QuickSite, a production web agency, and is currently conducting active research on NLP2Shell — a fine-tuned language model that translates natural language to shell commands. Keeping up with the market by developing an efficient workflow of AI tools for Vide Coding, providing with better code in lesser costs. Open to challenging roles in AI engineering, data science, and full-stack development.

Skill Highlights:

- Python
- C, C++, and C#
- JavaScript
- Machine Learning
- DSA, OOP
- HTML/CSS
- MERN Stack
- Assembly x86
- NLP, LLMs
- SQL Sever

Experience:

• Co-Founder, Lead Developer

QuickSite | One Page, Big Impact!

• Game Dev Trainer

GCUL – FSDS | Lahore, Pakistan | August 2022 – July 2023

Current Research:

NLP2Shell — *Natural Language to Shell Command Execution*

2026 – Present *Fine-tuned LLM research project*

GitHub: github.com/HassanNawaz14/nlp2shell

- Research Moto: *What if we could bypass the GUI layer with even more efficient and easier to interact layer of NLP2Shell translator between the OS and the User?*
- Fine-tuned Qwen2.5-0.5B on 26,000 NL→Bash pairs using LoRA
- Whisper STT → LLM predict → safety layer → subprocess execution
- Phases completed: data prep, fine-tuning, inference pipeline; CLI interface active; evaluation next
